

Bioengineering major and research at UC Merced

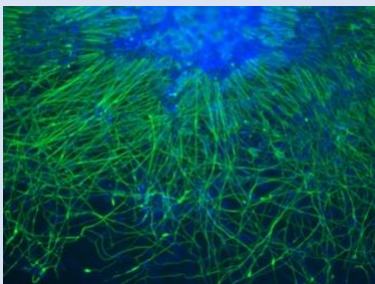

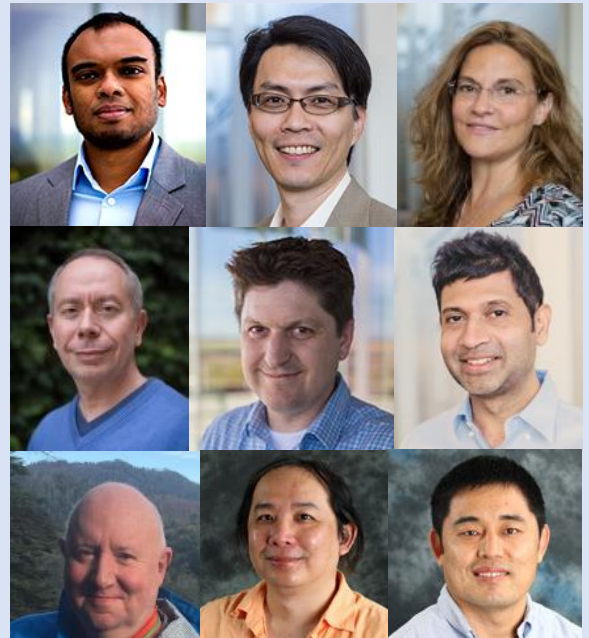

Faculty from the Bioengineering Department of UC Merced will introduce the **Bioengineering major and research** to Merced College Students

When: April, 30th from 2-4 pm

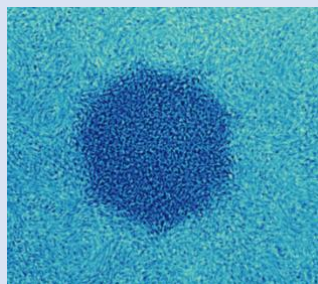

Where: Lesher Building, Room 111

Topics:

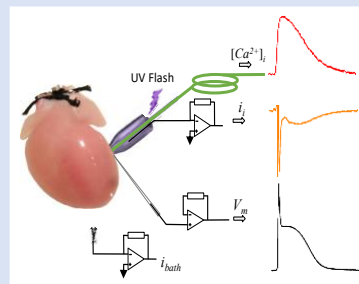

- Biology and Engineering combined to create "things"
- Discovery and research as an undergrad! This is the UC way!
- Career options and average salary of a Bioengineer
- A better path for Medical School and Biomedical graduate training
- You can work in what you are passionate about!

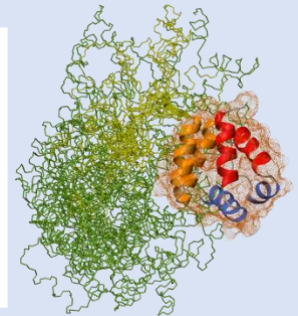

β -tubulin and nucleus of neuronal cells derived from human embryonic stem cells

Bacteria moving to the beat of light

Measuring ion currents in the intact heart

Understanding and designing protein function
