

2018 Science and Technology Enrichment Program

presents

Science for Humanity

A series of scientific talks for the community

hosted by the NSF-CREST Center for Cellular and Biomolecular Machines
at the University of California, Merced

community-focused, family friendly
discover how local research aims to improve the way we live
free admission & parking in North Bowl 1 Lot after 6pm

all are
welcome

JULY
19

Andy LiWang, Professor of Chemistry and Chemical Biology
University of California, Merced

THURSDAY, JULY 19 | 7:00 PM - 8:00 PM | SSB 170

“Biological Clock Reassembled in a Test Tube”

JULY
31

LeRoy Westerling, Professor of Management of Complex Systems
University of California, Merced

TUESDAY, JULY 31 | 7:00 PM - 8:00 PM | SSB 170

“Our Changing Climate and Extreme Wildfires in California and the West”

AUG
22

Armando Quintero, Executive Director, Sierra Nevada Research Institute
University of California, Merced

WEDNESDAY, AUGUST 22 | 7:00 PM - 8:00 PM | SSB 170

“Water in California – Connecting the Drops From Your Home to a Statewide View”

AUG
28

Kara McCloskey, Associate Professor of Bioengineering
University of California, Merced

TUESDAY, AUGUST 28 | 7:00 PM - 8:00 PM | SSB 170

“Regenerative Medicine: Hype or Hope?”

SEPT
26

Aleksandr Noy, Associate Adjunct Professor, University of California,
Merced; Senior Research Scientist, Lawrence Livermore National Lab

WEDNESDAY, SEPTEMBER 26 | 7:00 PM - 8:00 PM | COB 120

“Carbon Nanofluidics: Can Biomimetic Membranes Help Solve the Water Crisis?”

This series invites the local community to attend engaging sessions relevant to the area and times.
